

Richard Dean

Junior Frontend Developer | React | Next.js | TypeScript | JavaScript | Tailwind CSS
redhat1999@mailfence.com | Houston, TX | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Summary

Junior Frontend Developer who builds and ships responsive web applications with React, Next.js, TypeScript, and Tailwind CSS. Hands-on experience spanning an AI skin-analysis platform, a live e-commerce brand, and an NFT marketplace, each built and deployed to production. Brings a customer-facing hospitality background and a current university IT support role, adding strong communication, troubleshooting, and Linux fluency to a development team.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python

Frameworks & Libraries: React, Next.js, Redux, Tailwind CSS

APIs & Data: REST APIs, Fetch API, JSON, Firebase

Tools & Platforms: Git, GitHub, Vite, Vercel, npm, VS Code

Linux & Systems: Ubuntu / Linux, Bash, Raspberry Pi, self-hosting

Experience

Skinstric AI (Remote)

Sep 2024 - Apr 2025

Frontend Engineer

- Built a real-time skin-analysis web app with Next.js and TypeScript, integrating an AI vision API to return condition results to the user.
- Developed a responsive, animated interface with Tailwind CSS and GSAP, including dynamic recommendation cards and smooth loading states.
- Structured a modular component library and image-handling flow to keep the analysis UI fast, consistent, and easy to iterate on.

University of Houston (Houston, TX)

Sep 2022 - Present

Technology Support Specialist

- Provide first-line technical support to students and faculty across Linux and Windows systems, diagnosing hardware and software issues and communicating fixes clearly to non-technical users.

Residence Inn / Courtyard Marriott

Jan 2021 - May 2021

Hospitality Specialist

- Delivered fast, customer-focused service in a high-volume environment, developing the communication and problem-solving habits now applied to frontend work.

Projects

1337 Wing | [Live Demo](#) | [GitHub](#)

- React and Vite e-commerce brand: full shopping cart, product catalog, and a live HackerNews intel feed, self-hosted on Linux.

NFT Marketplace | [GitHub](#)

- React and Firebase marketplace UI: countdown timers, author profiles, and shimmer skeleton loading states for a smooth browsing experience.

Summarist

- React and Firebase book-summary SaaS: user authentication and Stripe subscription checkout in a Blinkist-style reading interface.

Education

Frontend Simplified

Jan 2024 - Aug 2024

Front-End Development Certificate

University of Houston

Unknown

B.S., Hospitality Administration and Management
